We are currently now looking to recruit a **Quality Manager** to become part of our success story.

This position, reporting to the Plant Quality Assurance Manager, will have the overall accountability and responsibility for Driving Quality & Continuous Improvement.

Job details:

- Supervise and guide Quality Engineers in meeting department and plant goals objectives.
- Develop Quality process, to ensure quality and reliability of products.
- Ensure full compliance with policies, procedures, GMPs and ISO 9000. Assume responsibility for proper documentation and revision control to meet FDA and company established standards.
- Assume responsibility for meeting inspection standard cost targets, i.e., yields, and min/pc.
- Prepare and manage budgets for specific projects and departments.
- Support existing products including floors focus, being responsive to the production floor in meeting plans, etc.
- Acts as technical expert within the QA group, providing support to quality engineers and to special projects requiring expert quality engineering knowledge.
- Assure proper and adequate Engineering Studies are conducted to ensure the process is in control.
- Supervise Technical Staff including Sr. Engineers, Engineers and Technicians including conducting of performance appraisals, forecast, salary increases, maintain staffing levels, implement development programs, etc.
- Function as Project Team Leader, if necessary
- Responsible for Plant and Transfer Validation Verification.
- Responsible to assist the QA Manager on the department activities such as yearly goals, objectives, dept. budget; identify areas of opportunity.

Your Profile:

Education

- Bachelors Degree in Engineering, Master Degree Desired

Knowledge & Training

- Ability to coordinate multiple projects, projects planning and work cohesively with all involved departments. Working knowledge of ISO 9000, GMPs and other FDA requirements.

Experience

- 5-8 more years related experience in quality systems and medical device manufacturing processes and developing inspection.
- Process for products, previous experience supervising technical positions
- Experienced in Quality Systems and Manufacturing field.

Skills

- Strong communication and developmental skills.
- Dynamic, and proficient in analytical and decision making abilities
- Good interpersonal and organizational skills

We offer:

- A competitive and comprehensive compensation package
- Career path with solid promotional opportunities
